

## TRIANGLES – Check Yourself

**Fill in the blanks.**

A triangle is a polygon with \_\_\_\_sides and \_\_\_\_angles.

\_\_\_\_\_ triangles have 2 sides of equal length.

\_\_\_\_\_ triangles have no sides of equal length.

\_\_\_\_\_ triangles have 3 sides of equal sides.

**Label the triangle as scalene, isosceles, or equilateral.**

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_ triangles have only acute angles.

\_\_\_\_\_ triangles have one obtuse angle.

\_\_\_\_\_ triangles have one right angle.

**Label the triangle as right, obtuse, or acute.**
