

Adding Fractions with Common Denominators – 1

Find the sum. Write the answer in simplest form.

$$\frac{5}{6} + \frac{1}{6} =$$

$$\frac{4}{12} + \frac{6}{12} =$$

$$\frac{3}{10} + \frac{7}{10} =$$

$$\frac{2}{14} + \frac{6}{14} =$$

$$\frac{3}{9} + \frac{4}{9} =$$

$$\frac{6}{16} + \frac{4}{16} =$$

$$\frac{1}{7} + \frac{3}{7} =$$

$$\frac{3}{10} + \frac{5}{10} =$$

$$\frac{8}{11} + \frac{3}{11} =$$

$$\frac{1}{8} + \frac{3}{8} =$$

$$\frac{3}{12} + \frac{1}{12} =$$

$$\frac{11}{14} + \frac{1}{14} =$$

$$\frac{9}{12} + \frac{3}{12} =$$

$$\frac{2}{8} + \frac{5}{8} =$$

$$\frac{9}{16} + \frac{3}{16} =$$

Adding Fractions with Common Denominators – 2

Find the sum. Write the answer in simplest form.

$$\frac{6}{10} + \frac{3}{10} =$$

$$\frac{3}{8} + \frac{3}{8} =$$

$$\frac{7}{12} + \frac{5}{12} =$$

$$\frac{5}{12} + \frac{3}{12} =$$

$$\frac{6}{9} + \frac{3}{9} =$$

$$\frac{4}{8} + \frac{3}{8} =$$

$$\frac{7}{10} + \frac{1}{10} =$$

$$\frac{1}{15} + \frac{4}{15} =$$

$$\frac{6}{8} + \frac{2}{8} =$$

$$\frac{5}{12} + \frac{4}{12} =$$

$$\frac{9}{14} + \frac{1}{14} =$$

$$\frac{3}{8} + \frac{2}{8} =$$

$$\frac{5}{16} + \frac{3}{16} =$$

$$\frac{1}{10} + \frac{8}{10} =$$

$$\frac{4}{18} + \frac{5}{18} =$$

Adding Fractions with Common Denominators – 3

Find the sum. Write the answer in simplest form.

$$\frac{1}{6} + \frac{2}{6} =$$

$$\frac{6}{20} + \frac{4}{20} =$$

$$\frac{4}{18} + \frac{5}{18} =$$

$$\frac{10}{16} + \frac{2}{16} =$$

$$\frac{7}{18} + \frac{5}{18} =$$

$$\frac{6}{9} + \frac{2}{9} =$$

$$\frac{4}{10} + \frac{2}{10} =$$

$$\frac{3}{15} + \frac{2}{15} =$$

$$\frac{4}{19} + \frac{3}{19} =$$

$$\frac{11}{12} + \frac{1}{12} =$$

$$\frac{6}{20} + \frac{4}{20} =$$

$$\frac{1}{16} + \frac{3}{16} =$$

$$\frac{3}{16} + \frac{5}{16} =$$

$$\frac{3}{15} + \frac{2}{15} =$$

$$\frac{4}{10} + \frac{4}{10} =$$
