Multiplication: Place Value and Expanded Form

1. Use place value and expanded form to write an expression that shows how to multiply 7 x 245.

_____

2. Use place value and expanded form to write an expression that shows how to multiply 4 x 567.

_____

3. Use place value and expanded form to write an expression that shows how to multiply 5 x 789.

_____

4. Use place value and expanded form to write an expression that shows how to multiply 9 x 147.

_____

5. Use place value and expanded form to write an expression that shows how to multiply 8 x 563.

_____

6. Use place value and expanded form to write an expression that shows how to multiply 5 x 376.

_____

7. Use place value and expanded form to write an expression that shows how to multiply 6 x 478.

_____

8. Use place value and expanded form to write an expression that shows how to multiply 2 x 973.

_____

Multiplication: Place Value and Expanded Form

1. Use place value and expanded form to write an expression that shows how to multiply 3 x 147.

_____

2. Use place value and expanded form to write an expression that shows how to multiply 6 x 768.

_____

3. Use place value and expanded form to write an expression that shows how to multiply 5 x 236.

_____

4. Use place value and expanded form to write an expression that shows how to multiply 7 x 378.

_____

5. Use place value and expanded form to write an expression that shows how to multiply 9 x 562.

_____

6. Use place value and expanded form to write an expression that shows how to multiply 4 x 672.

_____

7. Use place value and expanded form to write an expression that shows how to multiply 8 x 894.

_____

8. Use place value and expanded form to write an expression that shows how to multiply 6 x 237.

_____
