

Subtraction and Addition Practice – 1

1. Write the subtraction facts that will give the same difference as $20 - 6$.

$$15 - \underline{\quad} = \underline{\quad} \qquad 19 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 7 = \underline{\quad}$$

2. Write the addition facts that will give the same sum as $10 + 7$.

$$13 + \underline{\quad} = \underline{\quad} \qquad 11 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 5 = \underline{\quad}$$

3. Write the subtraction facts that will give the same difference as $15 - 6$.

$$13 - \underline{\quad} = \underline{\quad} \qquad 17 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 3 = \underline{\quad}$$

4. Write the addition facts that will give the same sum as $11 + 9$.

$$11 + \underline{\quad} = \underline{\quad} \qquad 15 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 6 = \underline{\quad}$$

5. Write the subtraction facts that will give the same difference as $16 - 7$.

$$14 - \underline{\quad} = \underline{\quad} \qquad 19 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 6 = \underline{\quad}$$

6. Write the addition facts that will give the same sum as $12 + 5$.

$$10 + \underline{\quad} = \underline{\quad} \qquad 13 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 6 = \underline{\quad}$$

7. Write the subtraction facts that will give the same difference as $17 - 8$.

$$10 - \underline{\quad} = \underline{\quad} \qquad 12 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 5 = \underline{\quad}$$

Subtraction and Addition Practice – 2

1. Write the subtraction facts that will give the same difference as $19 - 9$.

$$12 - \underline{\quad} = \underline{\quad} \qquad 16 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 5 = \underline{\quad}$$

2. Write the addition facts that will give the same sum as $11 + 8$.

$$12 + \underline{\quad} = \underline{\quad} \qquad 10 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 6 = \underline{\quad}$$

3. Write the subtraction facts that will give the same difference as $16 - 5$.

$$17 - \underline{\quad} = \underline{\quad} \qquad 18 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 10 = \underline{\quad}$$

4. Write the addition facts that will give the same sum as $13 + 7$.

$$15 + \underline{\quad} = \underline{\quad} \qquad 17 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 6 = \underline{\quad}$$

5. Write the subtraction facts that will give the same difference as $18 - 9$.

$$19 - \underline{\quad} = \underline{\quad} \qquad 15 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 10 = \underline{\quad}$$

6. Write the addition facts that will give the same sum as $11 + 9$.

$$12 + \underline{\quad} = \underline{\quad} \qquad 10 + \underline{\quad} = \underline{\quad} \qquad \underline{\quad} + 7 = \underline{\quad}$$

7. Write the subtraction facts that will give the same difference as $17 - 6$.

$$11 - \underline{\quad} = \underline{\quad} \qquad 13 - \underline{\quad} = \underline{\quad} \qquad \underline{\quad} - 5 = \underline{\quad}$$
